Engineered Oak

Pipers 14.3mm thick Engineered hardwood is suitable for creating a timeless, authentic floor design.

Its European sourced, 3mm white oak Hardwood. 100% PEFC certified ABC Grade with a double layer poplar substrate, finished with a highly resilient anti-scratch and UV coating.

Pipers versatile flooring, is easy to install, the 5G click system locks into place giving you flexibility in installation.

Due to its multi-layer construction, with a double layer poplar substrate, PIPERS engineered oak flooring stands up to moisture and resists humidity much better than solid hardwood. Therefore you can glue or float this product over a concrete slab. If you choose this route be sure to waterproof the subfloor and fix cracks before installation.

Remember to install a moisture meter to monitor humidity levels. Even though engineered boards have a higher tolerance to temperature fluctuations, they still contain natural wood.

PEFC Certified means our oak products are produced with respect for the highest ecological, social and ethical standards.

The simple act of sourcing or purchasing a product with the PEFC labels can have far-reaching positive implications, not least in terms of sustainable consumption.

You can refinish engineered oak once in its lifetime. They are conveniently already sanded, stained and sealed. Plus you can walk on them the same day they're installed. AS 4586:2013 Slip resistance classification of new pedestrian surface materials SRP value is 43. More technical information available online at www.pipersinternational.com.au

**“They can be installed
in bathrooms, kitchens
and in any room in your
home.
Acclimatation is not
required.”**

HYBRID FLOORING WATERPROOF & IMPACT RESISTANT

SPC (Stone Polymer Composite) core - 20 times x impact resistant than base laminates. SPC Floors are also fire resistant.

Our Hybrid Flooring utilises patented Valinge click technology and a micro bevel on four sides, that makes this floating floor easy to install with no adhesives needed.

The measured concentration of the volatile organic compounds (VOC) FloorScore® product certification is TVOC Range: 0.5 mg/m³ or less. Products bearing the FloorScore label meet the indoor air quality emissions criteria and are recognized by a long list of healthy building programs.

Almond

SIZE: 1545X 180 X 6.5MM
9 PLANKS / 2.5029M2 PER BOX

FLOORING CARE DETAILS

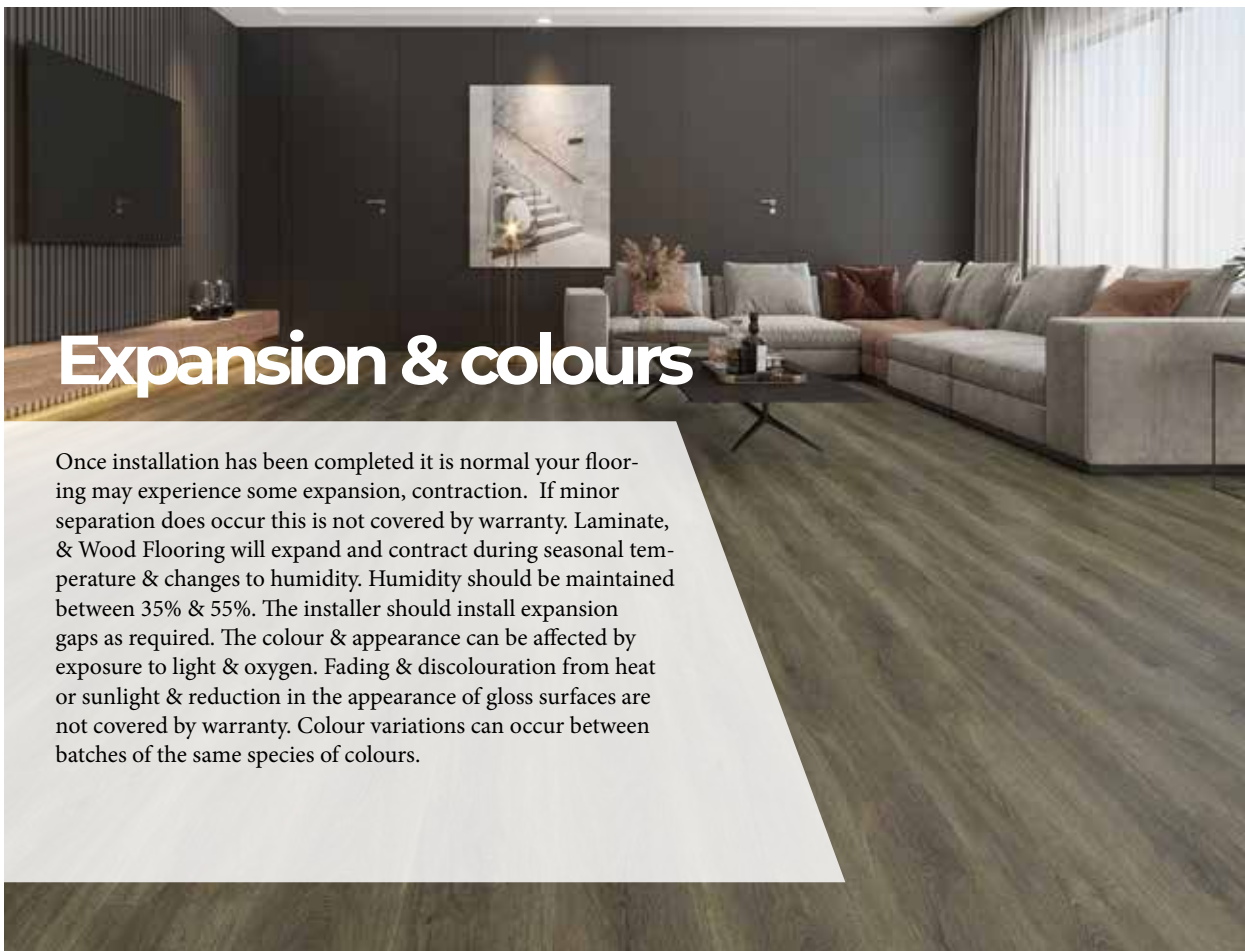

• After installation is completed, all dirt and debris should be removed immediately and the floor swept clean. For general everyday cleaning, ordinary vacuuming or sweeping is usually sufficient to keep the floor clean. If needed, occasionally clean with a moistened cloth. Always use clean water or a certified laminate floor or hardwood cleaner. Never flood the floor with water and never allow any liquid to sit on the surface of the floor. All spills should be cleaned up immediately. For tough spots, such as oil, paint, markers, ink, or tar, use a mild alcohol or nail polish remover with a clean cloth, then wipe the area with a damp cloth to remove any remaining residue. Never use wax, polish, abrasive or scouring agents as they may dull or distort the finish. Do not wash or wet mop the floor with soap, water, oil-soap detergent, or any other liquid cleaning material. This could cause swelling, warping, delimitation, joint line separation or other damage that may not be covered by your warranty.

CAUTION: To avoid possible permanent indentation or surface damage, proper floor protection devices such as protective pads must be used under furniture and appliances. Do not allow pets with unclipped nails to scratch or damage the floor. Use doormats at entrances to protect the floor from losing gloss. Avoid using rubber backed rugs, as they may stain or discolour the flooring. Avoid exposure to direct sunlight for prolonged periods of time. Use drapes to minimise direct sunlight during peak sunlight hours. Always remove shoes that are spiked or healed before walking on the floor. It's a good idea to save a few planks in case of accidental damage. Planks can be replaced or repaired by a flooring professional.

WARRANTY

- Laminate Flooring - The Customer has a ten (10) year manufacturer's warranty on the goods.
- Engineered Oak Flooring - The Customer has a twenty five (25) year manufacturer's warranty on the goods.
- Hybrid Flooring - The Customer has a twenty five (25) year manufacturers warranty on the goods.
- The Customer has a twelve (12) month warranty on Installation from the date of completion.

*This Manufacturer's Warranty is provided by Pipers International Pty Ltd.
A full description of the warranty terms and conditions is available under About us on
www.pipersinternational.com.au*

Expansion & colours

Once installation has been completed it is normal your flooring may experience some expansion, contraction. If minor separation does occur this is not covered by warranty. Laminate, & Wood Flooring will expand and contract during seasonal temperature & changes to humidity. Humidity should be maintained between 35% & 55%. The installer should install expansion gaps as required. The colour & appearance can be affected by exposure to light & oxygen. Fading & discolouration from heat or sunlight & reduction in the appearance of gloss surfaces are not covered by warranty. Colour variations can occur between batches of the same species of colours.

Hybrid: Iron Bark
